Subject Index

ABAQUS finite element model 233-245
Abrasive wear 17-27
Accumulator valves 65-74
Additives 1-15
Adhesion between rough solids 269-280
Algorithms 29-44
Automotive valve train wear 135-144,145-152

Ball-bearings 173-178
Bearing pads 125-133
Bearings, ball- 173-178
Bearings, ferro fluid lubricated 199-204
Bearings, hydrodynamic journal 45-53
Bearings, hydrodynamic oil-film 55-63,65-74
Bearings, hydrostatic thrust 75-79
Bearings, journal 45-53,179-187
Bearings, multi-pad journal 125-133
Bearings, offset halves 179-187
Bearings, rolling element 113-124
Bearings, single-axial groove journal 45-53
Bearings, sliding 173-178
Bearings, surface 125-133
Bearings, thrust 125-133
Bearings, thrust cone 107-112
Bearings, tilting pad 179-187
Bearings, variable impedance 55-63,65-74
Blended lubricants 213-219
Bore distortion 29-44
Boundary film measurement 1-15

Circular contacts 247-258
Circumferential supply grooves 221-232
Cones, crowned 97-105,107-112
Cones, thrust 85-96,97-105,107-112
Contact pressures 281-284
Contacts, circular 247-258
Contacts, rolling 233-245,259-268
Continuously variable transmission 205-212
Crowned cones 97-105,107-112
CVT - *see* Continuously variable transmission
Cylinder liner surface layers 17-27

Dampers, squeeze film 221-232
Damping 65-74
Deep drawing 189-197
Dents 233-245

Ecotribology 159-172
Elastohydrodynamic lubrication 1-15,85-96,97-105 113-124,247-258,259-268
Elastoplastohydrodynamic lubrication 233-245
Emissions, exhaust 213-219
End-seals 221-232
Engine performance 213-219
Engine running time 213-219
Engine temperature 145-152
Engines, two-stroke 213-219
Exhaust emissions 213-219

Ferro fluid lubricated bearings 199-204
Film clearance 125-133
Film thickness 1-15,85-96,97-105,107-112 113-124,135-144,233-245,247-258
Finite element model, ABAQUS 233-245
Fractal geometry 269-280
Frictional behaviour 189-197

Gears, helical 85-96,97-105
Groove area 125-133

Half-toroidal traction drive CVT 205-212
Helical gears 85-96,97-105
Honing 17-27
Hydrodynamic film 85-96,97-105
Hydrodynamic journal bearings 45-53,55-63
Hydrodynamic oil-film bearings 55-63,65-74
Hydrostatic thrust bearings 75-79

Inclined surface bearings 125-133
Interferometry, optical 259-268
Ironing process 189-197
Isoviscous solution 153-156

Japan 159-172,173-178
Journal bearings 45-53,179-187
Journal bearings, hydrodynamic 45-53,55-63
Journal bearings, multi-pad 125-133
Journal bearings, single-axial groove 45-53

Liner surface layers, cylinder 17-27
Liquid vapour mixtures 75-79
Low contact velocities 135-144
Lubricant starvation 29-44,113-124
Lubricants, blended 213-219
Lubrication, elastohydrodynamic 1-15,85-96,97-105 113-124,247-258,259-268
Lubrication, elastoplastohydrodynamic 233-245
Lubrication, thermohydrodynamic 179-187

Mechanical seals 153-156
Methyl esters, palm oil 213-219
Mirror motor, polygon 199-204
Modelling 1-15,29-44,55-63,65-74
Multi-pad journal bearings 125-133

NMR spectroscopy 145-152
Non-dimensional pull-off force 269-280
Non-Newtonian behaviour 247-258
Nuclear magnetic resonance - *see* NMR spectroscopy

Offset halves bearings 179-187
Oil analysis, used 145-152
Oil-film bearings, hydrodynamic 55-63,65-74
Oil supply 221-232
Oil temperature 145-152
Optical interferometry 259-268

Pads, bearing 125-133
Palm oil methyl esters 213-219
Parallel surface bearings 125-133
Parched lubrication 113-124
Peugeot TU-3 engine 135-144,145-152
Piston ring seals 221-232
Piston ring wear 213-219
Piston rings 17-27,29-44
Plasticity index 281-284
Polygon mirror motor 199-204
Polymeric additives 1-15
Power train system 205-212
Pressure 75-79,259-268
Pull-off force, non-dimensional 269-280

Ram pressure 125-133
Reynolds equation 153-156
Rolling contacts 233-245,259-268
Rolling element bearings 113-124
Roughness, one-dimensional 281-284
Running time, engine 213-219

Seals 153-156
Seals, end 221-232
Seals, mechanical 153-156
Seals, piston ring 221-232
Single-axial groove journal bearings 45-53
Sliding bearings 173-178
Solids, rough, adhesion 269-280
Space tribology 173-178
Squeeze-film dampers 221-232
Starved lubrication 29-44,113-124
Static characteristics 45-53
Steel sheets, zinc-coated 189-197
Stiffness 65-74
Supply grooves, circumferential 221-232
Surface tension 113-124

Temperature prediction 45-53
Temperature profiles 45-53
Thermodynamic analysis 153-156
Thermohydrodynamic lubrication 179-187
Thrust bearings 125-133
Thrust bearings, hydrostatic 75-79
Thrust cone bearings 107-112
Thrust cones 85-96,97-105
Thrust tracks 85-96,97-105
Tilting pad bearings 179-187
Transmission, continuously variable 205-212
Tribology research review 159-172
Tribomaterials 159-172
Two-stroke engines 213-219

Used oil analysis 145-152

Valve train wear, automotive 135-144,145-152
Valves, accumulator 65-74
Variable impedance bearings 55-63,65-74
Velocities, low contact 135-144
Viscosity 75-79,259-268

Wear, abrasive 17-27
Wear, automotive valve train 135-144,145-152
Wear, piston ring 213-219
Wear resistance 17-27

Zinc-coated steel sheets 189-197
